

Michela Fratini

Curriculum Vitae

Rome,

August 13, 2015

Part I – General Information

Full Name	Michela Fratini
Date of Birth	April 06 1979
Place of Birth	Rome, Italy
Citizenship	Italian
Address	CNR-Nanotec (Roma unit) c/o Department of Physics, La Sapienza University Piazzale Aldo Moro, 5 00185 Rome Italy IRCCS Fondazione Santa Lucia, MARBILab, Via Ardeatina, 306 00179 Roma - Italy
Mobile Phone Number	+39 06.4991.3483 +39 065150.1527
Certified e-mail (PEC)	michela.fratini@pec.it
Regular e-mail	michela.fratini@gmail.com
Spoken Languages	-Italian (mother tongue); -English (good); -French (basic).

Part II – Education

Type	Year	Institution	Notes (Degree, Experience,...)
Master degree in Physics (Laurea in Fisica)	2004	Sapienza University of Rome (Italy)	-Thesis title: “Mapping of the photoinduced local ordering in non equilibrium system using synchrotron X-ray radiation”
Specialization in Medical Physics	2007	Specialization School of Medical Physics (SSMP) of the University of Rome "La Sapienza" Rome (Italy)	Thesis title: “A New Method For Making A Photo Controlled Superconductor Device For Magnetoencephalogram (MEG) (Rw-Squid)”
PhD degree in Physics	2016	University Roma Tre of	Thesis title: “A New Method For Making A Photo Controlled Superconductor Device For Magnetoencephalogram (MEG) (Rw-Squid)”

Part III – Academic Appointments

Start	End	Institution	Position
Dec 2004	Sept 2005	Sapienza University of Rome (Italy)	Fellowship on topic “Control and manipulation of heterogeneity in complex matter” (COFIN 2003 program).
Dec 2005	Nov 2008	Sapienza University of Rome (Italy)	Fellowship on topic “Controlling Mesoscopic Phase Separation (CoMePhS)” (STRP program funded by the EU, comprising thirteen European Universities or Research Institutes from eight countries).
Mar 2009	Mar 2011	CNR-IFN (Italy)	Post Doctoral fellowship on topic “Advanced X-ray source based on field emitting carbon nanotubes cold cathode (AXIS)” project, SME program funded by the EU.
Mar 2011	Jun 2015	Fermi Center (Italy)	Post Doctoral fellowship on topic “ Spinal cord fMRI modulation”
Jul 2015	Jun 2016	CNR-Nanotec	Post Doctoral fellowship on “VOXEL” project - Volumetric medical X-ray imaging at extremely low dose- (FET OPEN, Project ID: 665207), funded by the EU.

Part IV – Teaching experience

Year	Institution	Lecture/Course
2007-2012	Sapienza University of Rome (Italy)	Tutor for the course of “European Computer Driving Licence (ECDL)” Department of Engineering
2013-2016	Roma Tre University (Italy)	Teaching assistant for the course on “General physics” for the students of engineering
2013-2016	Sapienza University of Rome (Italy)	Teaching assistant for the course on “Medical physics” for the students of physics

Part V – Awards, Honors and Habilitations

Year	Title
2011	Prize in memory of Zsolt Kajcsos , for the best oral by early stage researchers.
2012	Fonda-Fasella award 2012 , for a young researcher who obtained important results while working at Elettra Sincrotrone Trieste
2013-2019	Habilitation as Associate Professor for 02/B1(Fisica Sperimentale della Materia)

Part VI – Funding Information [grants as PI-principal investigator or I-investigator]

Year	Title	Program	Grant value
2016	Multimodal experimental and theoretical approach for the study of the Spinal Cord in healthy and diseased subjects.	A young researcher project of the Italian Healthy Ministry” GR-2013-02358177	9.50/10

Part VII – Research Activities

Keywords	Brief Description
X-ray synchrotron techniques	Michela Fratini (M.F.) received her master degree in Physics ('04) from Sapienza University of Rome (SUR), with a thesis centered on the study and the manipulation of the intrinsic inhomogeneities of oxide superconductors using high resolution X-ray techniques. She then received the Specialization in Medical Physics at SUR ('04-'08) acquiring skills in the most common diagnostic techniques, in particular in X-ray imaging and magnetic resonance imaging (MRI) techniques.
X-ray micro diffraction	During her specialization thesis she combined her two areas of interest, developing a method for the realization of Magnetoneurography-SQUID devices through the direct writing of μm -sized arrays of Josephson junctions via X-ray photon illumination of high-Tc superconductors. During the specialization thesis she obtained a 3-year fellowship (between 2005-2008) in the CoMePhS (Controlling Mesoscopic Phase Separation) project, a STRP program funded by the EC that comprised thirteen European Universities and Research Institutes from eight countries. The goal of the project was to understand the inherent phase separation mechanism in manganites, superconductors and related compounds, in order to manipulate their self-organized structure and to use the technique in nanotechnology by creating functional textured states. In this framework she established important collaborations with Dr. W. Prellier of the University of Caen and CNRS (CRISMAT) and with G. Aeppli, professor at the University College of London and Director of LCN (London Center for Nanotechnology). These collaborations yielded significant results, published in Nature, Nature Materials and PNAS, included in the highlights of ESRF and Elettra, and covered by popular-science journals like Wired. During her specialization she started a very important collaboration with Dr Manfred Burghammer, the scientific responsible of the X-ray microdiffraction beamline (ID13), at ESRF and with Dr L. Barba at ELETTRA. From '09 to '11 she won a fellowship at the Institute of Photonics and Nanotechnologies (IFN), CNR, Rome, in the framework of an European project "AXIS" SME's project to develop a compact X-ray source based on the emerging technology of carbon nanotube field emission for biomedical applications. Thanks to this project she established collaborations with York Probe Source (UK), Delong Instruments (Czech rep), Xenocs (France) and Scanco (Switzerland). During the project she was invited to work (for ~1 month in total) in the laboratory of prof. L. Pina at the Techn. Univ. Prague, to assemble the X-ray source with the cathode that had been developed in Rome. In addition she participated in other activities of the IFN group, in particular 1) in X-ray phase contrast tomography (at SYRMEP- ELETTRA) and X-ray microdiffraction experiments on engineered tissue and 2) in the study of intracellular magnesium with X-ray microfluorescence (uFX) and AFM (at APS, ELETTRA and ESRF). From '11 to the June 2015 she worked on a fellowship at Enrico Fermi Centre MARBILab/IRCS Fondazione Santa Lucia, to study the spinal cord BOLD modulation with functional MRI. During this period she also participated to the collaboration with Prof. C. A. Porro and Dr. Paul Summers of the Dipartimento di Scienze Biomediche of the University of Modena e Reggio Emilia, taking part to spinal cord fMRI experiments at the NUOVO OSPEDALE CIVILE S. AGOSTINO-ESTENSE DI MODENA. She was involved in the nationally-funded Premiale project NETFUN about the development of advanced quantitative imaging technologies using MRI, and to their application to the characterization of the cerebral functional network in neurodegenerative pathologies in collaboration with Prof. R. Wise of the Brain Research Imaging Centre (CUBRIC) at the School of Psychology- Cardiff University. In July 2015 she won a post doc fellowship at the CNR-Nanotech of Rome, in the framework of an European project "Voxel" Fet EU 's project, to study the neuronal network and vascular network in the healthy and diseased Central Nervous System using High resolution X- ray Phase contrast Tomography.
X-ray tomography	
Complex matter	
Biomaterials	
Spinal cord	

	<p>both in the training of numerous Master thesis and PhD. students and in her work as an assistant for several undergraduate courses in biophysics, medical physics and general physics . In December 2013 M.F. has been granted the habilitation as Associate Professor for 02/B1 (Fisica Sperimentale della Materia). During her career, M.F. was a member of the local organizing committees for the following conferences and workshops :</p> <ol style="list-style-type: none"> 1) International School on Magnetic Resonance and Brain Function : Erice 6-May 2011, May 2014 2) International Conference on "FeAs High Tc Superconducting Multilayers and Related Phenomena" Superstripes2008 Roma 9-13 December 2008, 3) Symposium_COMEPS EU Project 2008 Roma 11-12 April 2008, 4) 5th International Conference Stripes06 December 17-22, 2006

Part VIII – Summary of Scientific Achievements

Product type	N.	Notes	Start	End
Articles (as defined by ISI Web of Science)	39	Database: ISI Web of Science (WoS);	2005	2016
Books Chapters [scientific]	2	See: 1)info:YVAAQhnI1EJ:scholar.google.com 2)info:4Zt4lcDqmGsJ:scholar.google.com	2015	2015
Invited Seminars	1	At ESRF (European Synchrotron Radiation Facility)	2009	2009
Conference papers & Abstracts		Database: ISI WoS	2005	2015

Oral presentations at International conferences, workshops, and Symposia

- 1) M. Fratini et al. Different complementary X-ray techniques coupled to new analytical tools for studying Biomineralization. SILS 2015 Trento 10-15/07/2015
- 2) M. Fratini et al. Simultaneous 3D imaging of the micro-vascular network and neuronal system of the spinal cord in mouse. Biophysics@Rome2015 Rome 28-29/05/2015
- 3) (invited talk) M. Fratini et al. Simultaneous imaging of micro-vascular network and neurons morphology of the spinal cord INTERNATIONAL SCHOOL ON MAGNETIC RESONANCE AND BRAIN FUNCTION XI WORKSHOP Erice 18-25/05/2014
- 4) M. Fratini et al. Study of the vascular network in the spinal cord using advance techniques. Termis EU 2014 chapter meeting 10-13 June 2014 Genova
- 5) (invited talk) M. Fratini et al. X-ray micro-diffraction and phase contrast tomography applied to biomaterials 12th International school and Symposium on Synchrotron Radiation in Natural Science 10-15 June 2014 Warsaw

- 6) "Combination of X-ray micro-diffraction and X-ray phase contrast on engeneered tissue". M. Fratini, G. Campi, A. Cedola, MIME-MATERIALS in MEDICINE (Faenza) 8-11/10/ 2013
- 7) (invited talk) "Manipulation and Control of Oxygen interstitials in a Cuprate Superconductor, La₂CuO_{4+y}, using X-ray diffraction", M. Fratini, G. Campi, A. Bianconi. Science@CERIC workshop, ICT, Adriatica Guesthouse (Trieste) December11-12 (2012)
- 8) "Towards on Advanced x-ray source based on field emitting Carbon Nanotubes cold cathode: latest update", M. Fratini, S. Iacobucci, A. Rizzo, F. Scarinci, S. Lagomarsino, G. Stefani , Yan Zhang, Mark Mann, William I. Milne. COST MP0601 WG and MC meetings "Short wavelength laboratory sources" Paris, November 16-18 2011 (France)
- 9) "Determination of Mg concentration map in whole cells by nanoprobe techniques", M. Fratini et al. 8th International Conference on Stripes and High Tc Superconductivity STRIPES 11 : " 1° Conference on QUANTUM PHYSICS OF LIVING MATTER", Sapienza University of Rome July 12-13 (2011)
- 10) "AXIS _Advanced x-ray source based on field emitting Carbon Nanotubes cold cathode", M. Fratini, A. Rizzo, S. Iacobucci, M. Ilie, F. Scarinci, S. Lagomarsino, G. Stefani , Yan Zhang, Mark Mann, William I. Milne. INTERNATIONAL CONFERENCE ON NANOSTRUCTURED MATERIALS - NANO 2010, University "La Sapienza" Roma – ITALY September 13 - 17, 2010
- 11) "Advanced x-ray source based on field emitting Carbon Nanotubes cold cathode"; M. Fratini, M. Ilie, F. Scarinci, S. Lagomarsino, A. Rizzo, S. Iacobucci, G. Stefani. COST MP0601 WG and MC meetings "Short wavelength laboratory sources" Smolenice, November 23-24 2009 (Slovakia)
